Outdoor & Indoor Furniture

Polyrattan is a durable, weather-resistant synthetic material designed to withstand both rain and UV rays. It closely mimics the look of traditional rattan but is far more practical.

Maintenance is easy—just wipe it down with a soft cloth, a gentle brush, and a mild soap like CAVO Polywash. It's perfect for outdoor use in various climates.

Polyrattan comes in various weaves, using 1, 2, or 4 strands for different looks and textures.

Nonwood is a high-quality plastic material with a beautiful finish that looks and feels like real wood. It won't absorb moisture, so it's resistant to rot and mould, and it holds up incredibly well in all weather conditions. Simply clean it with soapy water—no fuss required.
